

Quick 42™

Frame Alignment System for
Cosmetic and Structural Damage

CAR-O-LINER®
Your safety - our mission

Quick Benefits For Your Bottom Line

Designed for Cosmetic and Structural Repairs

Quick 42 is a phenomenal, multi-functional bench designed to manage every type of damage productively and accurately.

It provides easy access for cosmetic repairs and offers the ability for anchoring on the same platform if structural repairs are needed, thus shortening repair cycle times and resulting in a 'quick' solution to increase shop profitability.

Outstanding Capability to Maximize Output

Compatible with the Car-O-Tronic™ Vision X3 measuring system and EVO™ Universal Anchoring and Holding System, the Quick42 offers a complete repair solution, providing technicians a timesaving process to easily diagnose, fixture, and repair automobiles to their pre-accident condition. Maximizing repair capabilities and quality enhances bodyshop output and increases customer satisfaction.

Speeds up the Repair Process

Fast set-up, easy access, on-wheels measuring, quick anchoring and adjustable working height are features that measurably decrease repair time. Cosmetic repairs can be made while the vehicle is still on its wheels. And if structural damage is discovered, the repairs can begin immediately without changing benches. That's efficiency!

Sustainable Solutions that Increase your Profits

Creating products that minimize a body shop's downtime, unnecessary work and transfers results in sustainable and long-term value for our customers. We work together with car manufacturers, bodyshops and insurance companies to constantly improve our products and develop solutions that keep pace with ever changing technological advances. Products that add value today as well as in the future — that's sustainable business for Car-O-Liner as well as for our customers.

*Also available in grey
to meet certain OEM
approved equipment
standards*

Features and Benefits

- Universal set-up reduces time, cost and space
- Integrated power unit increase safety by keeping the floor clear of hydraulic and air lines
- Lightweight removable ramps allow for easy vehicle access
- Powerful 10-ton draw aligner with multi-angle pulling and 360° access allows the technician to access the vehicle from just about anywhere
- Compatible with EVO Systems 1, 2 & 3 and the Car-O-Tronic™ electronic measuring systems giving you a total solution for all collision repairs
- Flexible installation; fixed, mobile or pit mountings makes it easy to fit into any workshop
- Meets several OEM equipment requirements further increasing your workshops's offering and therefore your profits

Quick and efficient diagnosis of structural damage while the vehicle is supported on its wheels or in a clamped position

Secure clamping: the best grip — no clamping slip

Integrated multi-functional power unit for hydraulics, lift, pulling towers and air tools

User-friendly hand control with all-in-one functions for automatic bench tilting, lifting, 10-ton pulling and hydraulic jacking

Efficient vehicle mounting with hydraulic pillar jacks

Effective holding and clamping with no need for dedicated, vehicle specific fixtures when using the EVO 1, 2 & 3 holding and anchoring system

Premium Quality for Exceptional Benefits

Characterized by premium quality

In order to achieve premium quality, Car-O-Liner's R&D department worked closely with original equipment manufacturers when creating the **Quick 42**. We wanted to develop a bench that met their requirements now and in the future. For us, and our OEMs, premium quality means more than just the engineering standard of the product or the choice of materials and design, it is also about the system's value.

Quick 42 is loaded with value-giving features that make the work process easier, faster, more accurate and quite simply, better – functions that offer premium quality.

Easy access; lightweight multi-purpose ramps allow quick and easy access to damaged parts, anchoring points and upper body areas

Timesaving and ergonomic with removable multi-purpose ramps adaptable to suit wide and narrow wheelbases.

Precise information with accurate, real-time measuring throughout the process when used with the Car-O-Tronic Vision Measuring System and Car-O-Data, the world's leading database providing information from diagnosis to final documentation

Maximize the Benefits of Quick 42

Hold On to More Business

Support the entire vehicle repair process when you integrate **Quick 42** with other Car-O-Liner product solutions. By adding any one of Car-O-Liner's EVO Systems for anchoring and holding you get a flexible, universal system with few components – but many possibilities.

Car-O-Liner Truck Clamping kits are another ideal companion to the **Quick 42**. Truck clamps have set industry standards for full-frame repairs, allowing you to anchor and repair any full-frame compact truck, van and SUV on the market – with holding power that far exceeds pulling requirements.

Add to the **Quick 42** one of the Car-O-Tronic measuring systems and you'll get precise vehicle analysis with real-time measurements during the entire process.

With the **Quick 42**, EVO, Truck Clamping and Car-O-Tronic, you'll have the best solution for rapid results and premium quality — from diagnosis and repair to final check and documentation.

Technical Data

Lifting Platform

Dimensions LxW	4200 x 1110 mm
with draw aligner	5320 x 2230 mm
Min/Max height	480 - 1480 mm
Work Area Size (draw aligner on both sides)	3550 mm
Loading angle	Bench 3,5° Driving ramps 12°
Automatic tilt function	Yes
Mobile capability	Yes (optional)
Maximum height in ground	1000 mm
Milled surface for measuring	Yes

Hydraulics

Pulling force (per draw aligner)	10 tons
Lift capacity (max vehicle weight)	3000 kg
Lift capacity in ground (max vehicle weight)	3000 kg
360° Pulling capacity	Yes

Power 3Ph, 50Hz, 200/220/400V
1Ph, 60Hz, 110/220V

Your total solutions provider

... Complete systems and support

Invest in long-term success with the innovative technology and tools you need!

Car-O-Liner's total solutions provide you with:

- The right product for every repair
- Comprehensive OEM approvals
- Reliable technology to increase productivity, satisfaction, workflow and revenue

Platforms that increase productivity

Highly efficient welding systems

Assured quality control in real time with Car-O-Tronic Measuring System

WorkShop Solutions that facilitate lean production

EVO System for holding, anchoring and fixturing offers low operating costs

Knowledge is power, supplied by the Academy training programs

24 hour accessibility to Vehicle Information

Customer Service Worldwide

The Power of Knowledge

Training and Information solutions

Practical - Conveniently Located
